## Ants Control Fumigation Services

Ants are a very seasonal pest  
**(Mostly during the summer time).**

When an ant infestation occurs  
call us to set up our initial ant  
clean out service.

**We come and apply materials  
inside and outside of your home.**

So the ants can carry it back into  
their nests and share it with the  
colonies for a more dispersed  
control. Ants can have many  
colonies, so the initial clean out  
service should be followed up  
with weekly or every other week  
service to re-apply materials,  
especially to the exterior  
grounds. This will keep any  
infestations at bay and help you  
enjoy your family get together  
and Bar-B-Q's.

## Bees, Wasps & Yellow Jackets Control Services

Yellow jackets and bald-faced hornets are particularly aggressive and potentially dangerous especially when near their nest. These insects are social builders of paper-like nests in the ground, in wall voids behind siding or in trees or shrubs. The several thousand workers forage for food throughout the summer months to care for the larvae. Feeding on meat from carcasses, garbage or picnic table food to sugars from fruit, beer, and sweet beverages at picnic sites make them particularly annoying to humans. Treatment for these unpredictable, stinging insects requires a dust injected into the entrance of the nest.

As the workers move about, they get the dust on their hairs, clean themselves at night and consume a lethal dose of the dust formulation to kill the entire nest. Call CNG PEST CONTROL to schedule an inspection and treatment.

## Bed Bugs Control Fumigation Services

**Parasites:** Bed Bugs, Fleas, Ticks, Lice, Etc.

When servicing for bedbugs, lice, fleas, ticks, mites or other parasites we apply a very fine mist wide fan spray.

We treat infested areas which may include mattresses, box springs, bed frames, upholstered furniture, floors, carpets, cracks, crevices, baseboards, pet bedding. (Pet bedding should be cleaned or replaced).

**(We do not apply to bedding of infants and infirm individuals. The bedding should be replaced).** Customers must remove linens, pillows, blankets and wash before reuse. Customer must allow pesticide to dry before remaking bed. Customer can also vacuum before and after service to remove some of the bugs. Vacuum cleaner bag should be discarded in an outdoor trash can. Customer should stay out of treated area until chemical dries. Approximately 2-4 hours. We use suspend SC or similar product to control bedbugs, lice, fleas, ticks, and mites.

They all look really cute until they're nesting in your house, defecating on your walkway or making noise while you try to sleep. Pigeons, starlings, sparrows, gulls, geese, woodpeckers and other birds can become a nuisance in your home or business. Droppings are unsightly, and possibly carry dangerous diseases. Nests are often found inside a structure, where the mother birds are nursing chirping young. Woodpeckers are rattling you awake at dawn by pecking on your siding. Now, they're not so cute.

What to do? Call CNG PEST CONTROL! Most bird remediation relies on exclusion techniques. We do not want to hurt the birds. We just want to get them away from your property. Bird prevention tools include bird spikes that deter roosting, netting that prevents nesting and metal flashing to prevent pecking. We only use professional grade products that do not harm the birds. Exclusion is our primary goal. Fecal removal is also offered to sanitize your property. So, call CNG PEST CONTROL for all your bird problems. No job is too big, or too small! Call today!

## Birds Control Services

## Cockroaches Control Fumigation Services

Roaches/Water bugs We **highly recommend** our special 2 visit clean out service with regularly scheduled maintenance visits. Our initial clean out service begins with a thorough inspection to locate all nesting sites.

We then apply a clean out dosage of the proper materials to all necessary areas to eliminate the current infestation. We follow up the initial service with a 2nd visit in order to check up on the situation and re-apply materials where needed. After a clean out service is done, A maintenance scheduled should be undertaken. Whether we come weekly, monthly or every other month, materials need to be replenished to keep the infestation from returning and to keep any problems under control.

## General Fumigation Services

A very common service availed against all kind of crawling and flying pest, specially against Cockroaches, lizards, flies, mosquitoes, spiders, ants etc. Safest chemicals, approved by EPA and FDA are applied. Food stuff, utensils, medicines are to be removed for this services. Sensitive equipment and installations are to be properly covered. 24 Hours Exposure Time is required 3 months guarantee provided .Flying insects are not covered in guarantee. All complaints arising during guaranteed period are attended free of charge.

## Mosquito Control Fumigation

Malaria can kill a human. Our country is full of mosquitoes, Home, Offices, Factories Plants, Streets, Parks, Cinema, Mosques etc., wherever you go, you would face this dangerous specie. Lets fight against malaria.

We provides this service at subsidized rates by reducing their profit to none. Advance technology including heavy thermal foggers are used to control mosquitoes. Trust on us for protecting you from your enemy at an economical price and with best results. Instant Killing is Guaranteed for mosquito control services.

## Rodenticides Fumigation Services

The third smart specie on the face of the earth after human beings and monkeys are rats. They damage property, Valuable documents, furniture, fixtures etc. beside causing dangerous disease i.e. Plague. CNG's applies advance methods and systematic services to control this smart and dangerous animal.

CNG Pest Control has vast experience of controlling Rats at Fertilizers, Oil & Gas , Sugar , Cement, Textile , Hospitals and Hotel Industries etc. One Year , 6 Months and 3 months guarantee is provided involving periodic treatment. All complaints arising during guaranteed period are attended free of charge.

**Termite Control:**

These services undertaken, where drilling is not possible and we can not reach termites in the soil. Normally they are upper floors of multi stories office and buildings or residential apartments. In few cases basement with water proofing are also not treated with drilling.

This service is covered with one year guarantee.

**Termite Proofing:**

Termite damages wood and losses are in billions of dollars per year. Termite is found in all structures build by human beings .They live underneath the soil and comes up in search of food .Wood is their favorite food. Termite damages all objects other than made-up of metal i.e. furniture ,fixture, carpets, currency, documents, cloths etc.

There are two kinds of termite proofing:-

1. Post Construction Termite Proofing
2. Pre Construction Termite Proofing

Precaution is better than cure. Hence it's strongly recommended that buildings must be treated against Termites during construction.

CNG Pest Control's experts and trained professionals treats the buildings by applying latest technology .Safe and best termiticide available in the world are applied.

This service is guaranteed for five years. All complaints arising during guaranteed period are attended free of charge

## Termite Treatment Services

**Water Tank Cleaning** A chemical treatment is required using scientific methods for the cleaning of Under Ground & over Head Water Tanks. Initially the water tanks should be empty leaving a small quantity of water for the cleaning of inside walls of the tanks. Water tank cleaning will be carried out by using suction pump & submersible simultaneously. When dewatering procedure is complete chemical application on all the walls floor & ceiling will be given.

In order to have affective cleaning scraping /Scrubbing of all the walls by using hard nylon brushes with the chemical (potassium permanganate 25 g / 500 gallon, Calcium Hypochlorite 100g / 500 gallon) Washing of all walls top to bottom no tracing of dirt or the chemical left behind. Drying of all the walls from top to bottom with Cotton waste.
